EXPERIENCE

Software Engineering Intern, iFood

2026 – Present

Faster Core, Experimentation Platform

- Contribute to Faster, one of iFood's core internal platforms, enabling product teams to launch, manage, and measure experiments through remote config, event pipelines, and analytics.
- Build internal platform features that support autonomous A/B testing at scale, helping teams ship product changes safely and learn faster from data.
- Work on PathFinder initiatives to improve experiment allocation, segmentation, efficiency, and the Faster Admin experience for internal stakeholders.
- Collaborate with engineers, product managers, and data teams to evolve experimentation workflows, platform reliability, and business impact across iFood.

Founder and President, Grind ICMC - USP

2025 – Present

Technical Interview Preparation Extension Group

- Founded and lead an extension group focused on technical interview preparation, advanced algorithms, and soft skills for students targeting top technology companies.
- Organize study tracks, mock interviews, and mentorship initiatives that have already supported students approved in Big Tech selection processes.
- Produce free educational content in Portuguese, including recorded lessons and community materials shared on YouTube.

Undergraduate Researcher, Machine Learning for Road Safety (AVADiP - USP)

Aug 2024 – Sep 2025

Research in partnership with UFRJ, Stellantis, and Mobway focused on vehicular AI and data privacy

- Contribute with curation and quality control of video annotations across multiple annotators, providing reliable ground-truth data to train semi-supervised computer vision models for traffic safety.
- Built automated data pipelines to process, format, and organize large datasets, ensuring fast and reproducible machine learning experiments.
- Trained and fine-tuned computer vision models (YOLOv11) to significantly improve object detection accuracy in traffic scenarios.
- Developed automated metric dashboards that accelerated the team's feedback loops, directly supporting technical decisions and stakeholder reports.

DATA ICMC/USP

Jan 2024 – Dec 2025

Education, Development, Impact

- Co-organized the full *Python for Data Science* course covering Python fundamentals, OOP, NumPy, Pandas, Matplotlib, preprocessing, scikit-learn, web scraping, and a capstone, mentoring 2000+ registrants.
- Co-organized the *Machine Learning* course and taught a lecture on CNNs, covering fundamentals and a practical YOLO example.
- Led the website rebuild with React and TypeScript and built the Learning on Graphs Conference 2025 registration platform, supporting 900+ submissions with real-time confirmation and multilingual support.

SEMCOMP, Computer Science Week at USP

Jan 2024 – Jan 2025

Software Engineer and Hackathon Support

- Helped organize SEMCOMP, one of the largest computer science events in Latin America, contributing to the website, hackathon operations, and participant experience.
- Developed the official platform as a fullstack developer using TypeScript and MongoDB, with attention to performance, usability, and support during live traffic.

AWARDS

Champion, AI4Good - Brazil Conference 2026

2026

Presented at Harvard University and MIT

- Led the development of **Ta Certo Isso AI?**, a WhatsApp-based system for fake news detection powered by a multi-agent Google Gemini architecture, delivering evidence-grounded responses.
- Engineered an embedded analytics platform for researchers and journalists on Google Cloud Platform (GCP), utilizing Google BigQuery to enable semantic search across thousands of fact-checking analyses.
- Maintain the production system serving thousands of users (tacertoissoai.com.br), gaining national recognition through the AI4Good award and features in major media outlets such as Record, Globo, UOL, and Folha.

EDUCATION

B.Sc. in Computer Science, University of Sao Paulo (USP)

Mar 2022 – Present

Key Courses: Data Structures, Algorithms, Distributed Systems, Operating Systems, Statistics

Technical Degree in Systems Development, ETEC Prof. Camargo Aranha

Mar 2019 – Dec 2021
